Advanced technology
creates the ultimate experience

Ultra Slim | Ultra-narrow Bezel | Exclusive UI Interface | Simple Installation |
Integrated Solution

All-in-one Conference LED Display

T1

Saving space with
ultra-narrow and ultra-thin structure

● Ultra - narrow bezel of 6mm, up to 97% screen-to-body ratio.

● Ultra - narrow distance from screen to border of 36mm,
reducing redundancy in physical structure.

● Ultra - slim screen depth of 20mm, saving conference room space but
having beautiful appearance.

● Overall appearance of black, high-end and low-profile.

Exclusive UI system, particular and outstanding

- Unique black gold UI with three-dimensional icons.
- Various & customized icons.
- Free & convenient APPs adding.

Convenient installation, worry-free and time-saving

● User-friendly design.

● Reduction of on-site operation procedures by the design of segmented assembled structural units.

● No need to level and calibrate joints between segmented unit structures because of the high-precision die-cast aluminum cabinet.

● Meet the use requirements of different environments by wall-mounted or mobile bracket installation.

OPS-like independent master control

● The master control is an external fixing method, similar to OPS chassis, easy for commercial operation.

● Convenient to assemble and disassemble than the traditional built-in frame.

● The modular structure is in universal use for all-in-one screens of different sizes.
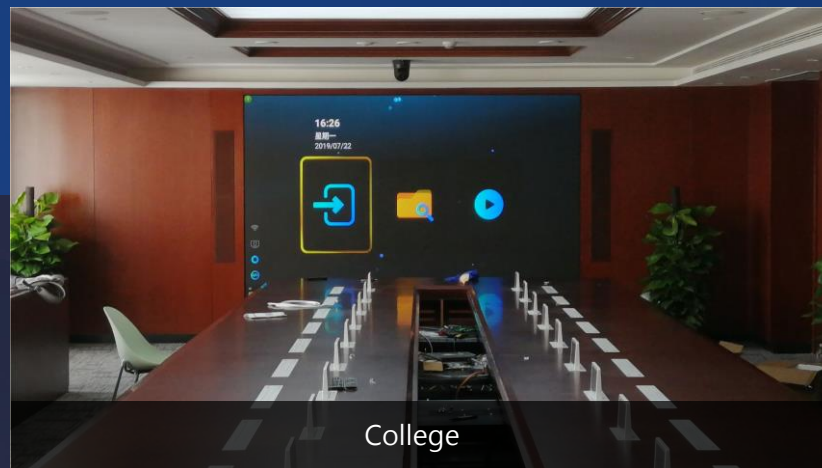

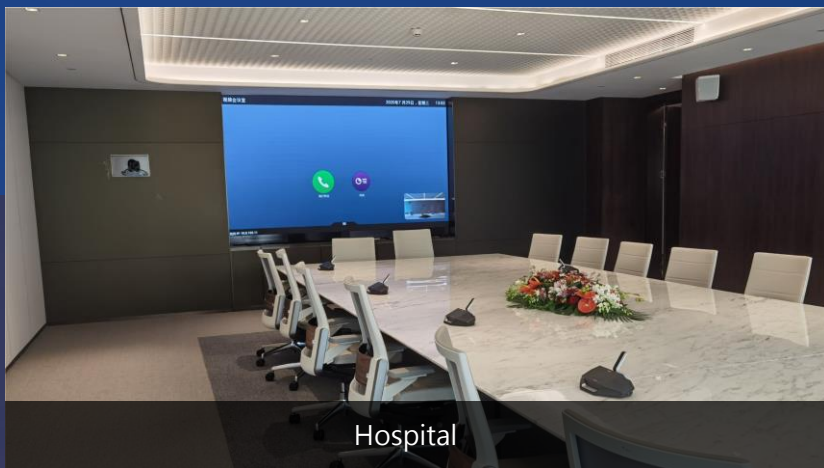

Optional color for bezel trim strip

● The frame design considers the user's visual needs, with decorative strips, to fit the decoration style of the meeting room or the corporate brand VI.

● The colour of trim strips can be selected from silver gray, sky blue and bright black, which are fit for the screen, calm and smart.
